### General Overview

These unique portable holding tanks were designed to be used primarily above ground, but with special accommodations, they may be used slightly below grade where allowed by local regulations. They have a nominal wall thickness of 1/4" and are very durable and resistant to impacts. The resin and color pigments are FDA food grade compliant. They eliminate the use of threaded and solvent-cemented conventional plumbing fittings, which are usually discarded after each use. The 3" (7.6cm) ports utilize "Fernco"<sup>®</sup> flexible rubber couplings, which are available in a variety of pipe sizes and plumbing configurations such as couplers, elbows, tees and caps. These flexible fittings are re-usable. These durable plastic polyethylene tanks are supplied with the top, center port #4, cut open with a 3" rubber cap and clamp provided. Other ports can be cut open and a rubber cap and clamp supplied at the customer's request for a nominal fee.
